

Steve and the other members of LAHLC:

On behalf of the Hardwood Forest Foundation and everyone involved in its message to children that harvesting trees is not always harmful to the environment, I extend my sincere gratitude and appreciation to you and your organization. It is an honor to accept your gracious donation of \$14,500 and I think the amount you were able to raise in these tough economic times speaks volumes, as it highlights the determination and dedication you have for educating young people about the forest products industry.

There is no other organization out there that has done what LAHLC has done for the Foundation in recent years. Your dedication to educating children through the Foundation is critical to the image of our great industry and your hard work through your Annual Golf Tournament exemplifies what commitment can do.

It is my promise that we will put your hard earned money to good use, as we continue to teach the truth about our industry one child at a time.

Sincerely,

Crystal Oldham
Executive Director
